PREFACE.

The following Tables have been prepared with the view of meeting an emergency which has arisen in consequence of the exorbitant rate of Exchange, and the high premium on Gold in the American money market.

A portion of them had been compiled for private use; but the author has been induced to extend them at the high rates indicated in the title-page, and to publish them for the more especial use of the Banker, the Exchange Broker, and generally for all who trade in sterling bills. The introductory Tables which show the advance of *one sixteenth, one eighth, one quarter, and three eighths* per cent., will, it is believed, be particularly useful, where the rate is at small fractional parts of one per cent.

The Tables of Commission, or Discount, occupy a considerable space; and, with those of Exchange, have been calculated and arranged expressly for this work, by the Author alone, thus assuring himself of the accuracy of the whole: and in the typographical execution, the utmost care has been taken to provide against errors of the Press.

In order to fix the price within moderate limits, the *Decimal System* has been, as far as possible adopted, the Author being persuaded that in practised hands the book will answer all the purposes it is intended to serve.

Quebec, January 1863.
